*Double Patenting*

1. Claims 23-37 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-22 of U.S. Patent No. 6,622,047. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present application are deemed to be obvious over the claims of the '047 patent.
2. Claims 23-37 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 22-37 of copending Application No. 10/661,640. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are considered to encompass structure that is obvious over each other.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

*Claim Rejections - 35 USC § 112*

3. Claims 23-37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the above claims, the electrodes should be claimed as being 'adapted to be' coupled to the patient's vagus nerve, in order to avoid inadvertently claiming the human body.

*Claim Rejections - 35 USC § 102*

4. Claims 23-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Wernicke et al (5299569).

See previous office action.

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

The remarks made by applicant have been considered, however the above rejections are still deemed to be proper. The Wernicke device is considered to encompass all of the *structure* of applicants' claims. Where the electrodes are placed inside the patients' body is considered to be intended use, not a structural limitation.
